INDUSTRIAL REVOLUTIONS

**TECHNOLOGY IS
EXPONENTIAL,
BUT HUMANS ARE NOT.**

Digitisation versus Digitalisation

The main drivers of change in 4IR

- High-speed Internet
- Big Data analytics
- Internet of things (IoT)
- Cloud Technology
- Artificial Intelligence
- 3D Printing
- Biotechnology
- Blockchain technology
- Gamification
- AR and VR
- Autonomous vehicles
- Nanotechnology

What does each have to do with me and my vocation?

Is 4IR good or bad?

4IR: boom or gloom?

**Two men looked out of prison bars.
One saw mud and the other saw stars**

High Road: #4IR

Low road: *Job losses*

WORLD'S 2ND-WORST

What happens to people in work?

Retraining required for 120m workers

By **SIBAHLE MALINGA**, ITWeb senior news journalist.
Johannesburg, 09 Sep 2019

By 2030

So we have jobs. Can we fill them? How good is our PSET supply side?

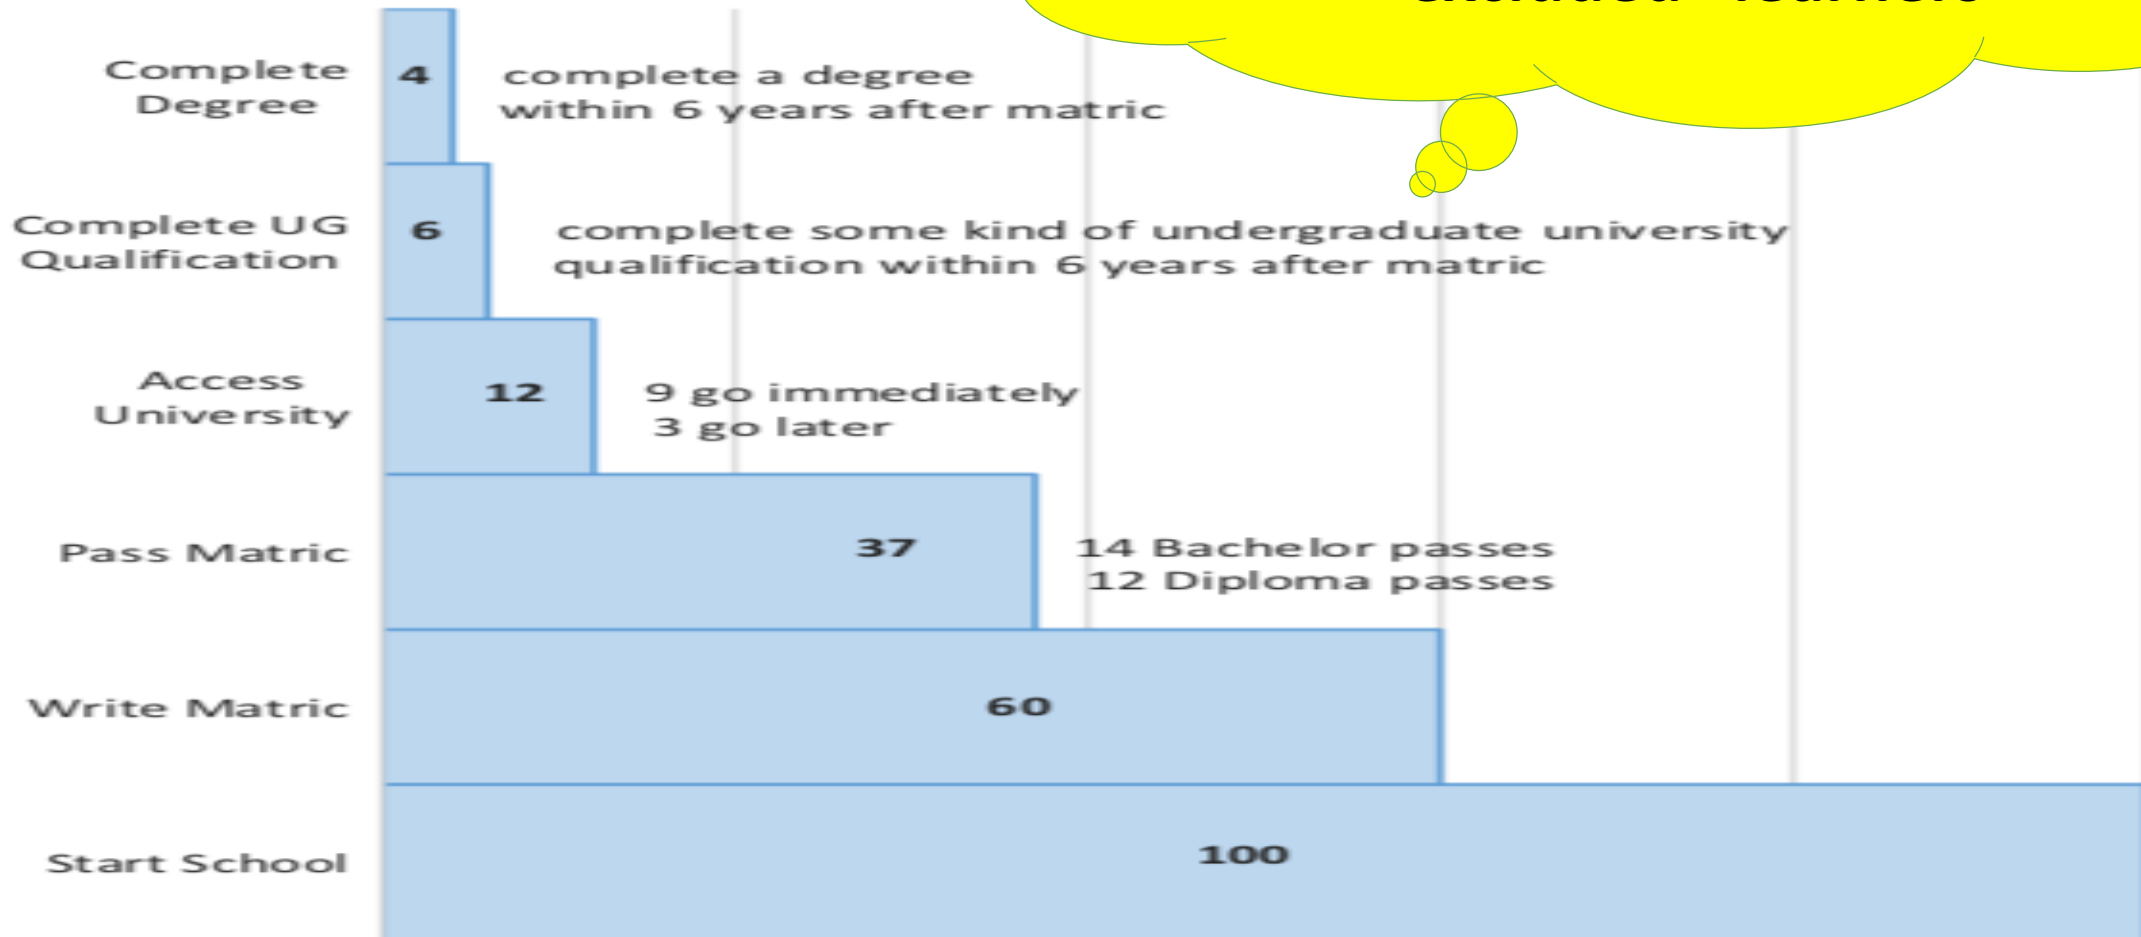

Skilling unemployed and underemployed

- Use 4IR for **skilling** for the **forgotten millennials** at TVETS and Community Colleges e.g. jobs using gamifications, AR, VR and simulations
- Use blended learning supported by technology

This is outside the PSET sector

4IR technology can be recursively used to support “excluded” learners

Throughput of the 2008 Grade 12 Class.

The numbers are flatlined ...

4IR Building blocks

Accounting skills - PG Diploma in Data Science

- **Advanced Excel** –Data Scientists still do the majority of their analysis in Excel at its highest potential, including the use of sophisticated data tables, statistical functions, report automation, and self-correcting models.
- **Data Mining/SQL Programming.** There are many programming languages for data analysis yet Data Scientists rely almost exclusively on SQL to query transaction databases for data analysis
- **Advanced (Revenue) Analytics.** Faster smarter pricing and sales channel optimization. This requires one to know how to get the right information and apply the right math through the right data set.
- **Mathematical Optimization.** One must understand the algorithms of mathematical optimization and its proper use them to provide creative solutions to unravelling puzzles.
- **Analytical Segmentation.** Highly targeted marketing, sales, and pricing strategies have been proven to deliver the most profit. Using data to reveal important trends at the customer level.
- **Visualization.** “Visualization” means the ability to reformat data insights for easy consumption depending on the audience. A CEO-view is not the way the Head of Marketing “sees”.
- **Real-Time Models.** The legacy latency of accounting reporting is the **reactive nature** of managerial decision making. Needs **more real-time dashboards and reporting.**

What are our emerging opportunities? i.e.
PSET

Opportunities

1. Square Kilometre Array (SKA)
2. Set-Top-boxes (STB's) **Missed Opportunity!!**
3. Spectrum dividend –4. National Health Insurance (NHI)
5. One tablet per child (OTPC or OLPC)
6. Bullet Train
7. One million climate jobs
9. Government support for entities with qualified audits
10. Voluntary retrenchments offered to government employees
11. Grant disbursements (NSFAS, SASSA, RAF)
12. Small Office Home Office (SOHO) *sharing economy*
13. 5G Internet of Things (IoT)

Inc GDP by 0.5%. 7x impact of Multichoice

SKA is evidence of 4IR possibilities

Square Kilometre Array project creates over 7 000 jobs

Digital Dividend

Rolling out 5G network will **boost GDP** by **0.25% to 0.5% of GDP**
Lower data costs and create new markets, and **between 300K to 600K jobs**

Waste Economy - 4IR will add to e-waste economy

The waste economy contributed **R24.3 billion** to ZA GDP in 2016. It created **36 000 formal jobs** and 80 000 informal jobs from **111 million tonnes of waste in 2016 – 106 tonnes in 2017**

Imagine if we improve our separation and recycling. It will create even more jobs. Only 10% recycled.

280m plant

Separate waste electronic and electrical equipment
Samsung and DTI e-waste campaign

Gig Economy – evangelize the digital economy

- Introduce, evangelize and systemically (policy, legislation, min wages etc.) support the **Gig Economy** to improve employment rates
- Around **15.6%** of the UK's workforce and **34%** on the US comprise the **gig economy**. This is expected to rise to **43%** by the year 2020

Gig work as the source of income in selected countries in 2018 (%)

Government 'to retrench 30,000 public servants in next 3 years'

Treasury has reportedly set aside R4-billion to kickstart the process of issuing severance packages

10 August 2018 - 07:56

BY STAFF REPORTER

Times LIVE

Job sharing for Minister Mboweni!

- Opportunity for aging workforce to
 - Manage exit,
 - Maintain institutional continuity through expedited skills transfer,
 - mitigating retrenchment-related “illnesses”

*Mitigate changes in jobs through SETA sector skills
planning and reporting*

Jobshift and job mobility

- This is the gradual shift in job description in the face of automation and disruptive change.
- The events are clear though the reaction is slowed by inaction

Calls for tech energy rethink as SA's coal exports dry up

By **ADMIRE MOYO**, ITWeb's news editor.

Johannesburg, 16 Sep 2019

Jobshift and Job Mobility

- Use **Reskilling** for employed folk to mitigate job extinction
- This involves **retraining** and keeping workers in the same roles, rather than fundamentally changing their jobs
- In the next **three years**, an estimated **120 million workers** in the world's **12 largest economies** will need to be retrained or reskilled

Retraining required for 120m workers

By **SIBAHLE MALINGA**, ITWeb senior news journalist.
