**HAPPY ,
Women's
DAY**

Women's Day is a time to reflect on progress made, to call for change and to celebrate acts of courage and determination by ordinary women, who have played an extraordinary role in the history of their countries and communities.

Women stand at the front lines of the COVID-19 crisis, as health care workers, caregivers, innovators, community organizers and as some of the most exemplary and effective national leaders in combating the pandemic. The crisis has highlighted both the centrality of their contributions and the disproportionate burdens that women carry.

At Inseta, we embrace this year's theme for Women's Day, "Women in leadership: Achieving an equal future in a COVID-19 world", as we celebrate the tremendous efforts by women and girls around the world in shaping a more equal future and recovery from the COVID-19 pandemic.

Change isn't just about big headline moments, legal victories and international agreements: the way we talk, think, and act every day can create a ripple effect that benefits everyone.
